

RUBIX

 part of
your
success

outstanding
service on tap
for the brewing
industry

understanding your business

Our vast experience means that we are able to better understand the unique and special needs that relate to your business and your own production processes.

We understand how important issues like hygiene, availability, health and safety and energy conservation affect your business. We also understand what impact these issues have on your requirements and how we can apply our expertise in your industry to provide you with the best parts, products and support.

For example, we know how operating conditions can have a big impact on your production lines, such as constant washdown, high sustained speeds and working with high temperatures.

We also understand that hygiene regulations require the application of special lubricants or the use of lubricant-free parts, and how in your drive for

optimal energy efficiency, you want to find the most energy efficient motors.

We know that there are key issues that can impact the parts you use in your production:

- Hygiene
- Health & Safety
- Waste costs
- Energy conservation
- Constant washdown
- High sustained speeds and temperatures
- Demands of continuous production

For businesses with a need to keep production lines running 24/7/365, always having the right part at the right time is vital – and we're here to help.

When work requires a specialist, look no further than our workshop services

Rubix operates four specialist engineering workshop centres. These engineering centres of excellence help minimise repair downtime thanks to the unrivalled levels of knowledge and engineering skill made available to all our customers – all geared towards saving you money. All work is quality assured (ISO 9001:2015, and fully accredited by the BFPA) and is carried out to the manufacturer's original specifications using genuine spares.

We're your specialists for:

- Gearbox repairs – we'll find the most cost-effective solution: repair, recondition or recommend a new unit
- Condition monitoring services
- CNC machining for one-offs or emergency replacements
- Customised chain cutting
- Pump repair and maintenance

At Rubix we have extensive experience of working with some of the biggest names in brewing. All across the UK, many businesses in the industry choose us for their industrial supplies and services because of our specific sector expertise.

All the parts, all the protection

Site safety is paramount – a protected team is a productive team. As part of our services we offer one of the UK's most comprehensive, compliant PPE clothing and equipment ranges to keep everyone working safely.

Cast Iron Motor

- Solid and integrated feet for easier installation and alignment
- Reduced noise and vibration with lower energy consumption
- Reduced temperature on windings and bearings

Stainless Steel Clean Line Cylinder

- Manufactured using stainless steel
- Designed for corrosion resistant solutions

Thermoplastic Chain

- Lowest friction coefficient
- Up to 40% superior wear resistance material
- Energy efficient due to lower power demands
- Split sprockets to suit every application and chain type
- Up to x 3 chain life improvement

Process Hoses

- Flexible and strong rubber hoses able to resist and absorb pressure/pulsing
- FDA compliant and EU regulations N. 1935/2004 and 2023/2006
- Hygienically swage couplings on the hose ends eliminates the gap between the coupling and the hose, ensuring the cleanliness of the assembly
- Colour coded hoses help to prevent product cross contamination

Motor Gear Units

- Designed for the brewing industry
- Corrosion and chemical resistant
- High IP rating for washdown
- Unique surface treatment with no paint to detach or flake off
- Smooth surface for easy cleaning

V & Wedge Belts

- High load carrying capacity
- Double fabric provides abrasion and wear resistance
- Shock, stretch, heat and oil resistant

Transmission Chains

- 24-hour operation 365 days a year
- Designed for limited lubrication capabilities
- Withstands high temperatures
- Engineered for hygiene-sensitive environments
- Operates in abrasive conditions

Hygienic Pipe Valves and Fittings

- Range of certified hygienic fittings, valves and tubes
- Time saving non-standard hygienic piping products held in stock, improving installation times

services that add real value to the brewing industry

Here is just one typical example of how we apply our specialist expertise to help companies in the brewing sector across the UK every day.

A brewery was experiencing issues with its keg filling back pressure valves. The original equipment manufacturer attended the site and claimed that the units were obsolete and the only solution was to modify pipework and fit new valves on all six keg-filling units. With the considerable downtime and cost involved, the brewer asked Rubix for advice.

After making some enquiries, we identified a supplier in the USA who could source the same back-pressure valves – a solution that would avoid all redesign costs and production line upheaval.

The new valves have been installed and also added to the clients critical spares – the new parts are made from stainless steel and should have a much longer lifespan.

This solution saved the customer over £20,000.

Molded/Solid Oil Technology Bearings

- Specifically developed technologies for applications requiring high levels of hygiene
- Ensures the correct amount of lubrication is supplied to the bearing to suit environment - maintenance free
- Minimises contamination and water ingress during cleaning
- Operating life up to twice as long as grease lubrication in water or contaminated environments

Maintenance Free Bearing Ranges

- Latest re-lubrication free technology – Food grade, optically detectable components, hygienic housing designs and innovative bearing sealing system prevents ingress of contamination and bacteria
- Corrosion resistant bearings with food grade grease and high performance sealing designed to increase life
- Stainless steel and composite housing ranges available - strong, lightweight and chemical resistant
- Designed to eliminate washdown related corrosion and premature failure

High Temperature Bearings

- Designed for operation in extreme temperature environments
- Special component materials, internal geometries and seal materials designed to improve bearing life
- Improved machine reliability as premature failure due to temperature is avoided
- Reduced maintenance and downtime - designed for increased life

Linear Bearings

- Range of stainless steel Linear Guide Rails designed to reduce risk of corrosion and maximise life
- Maintenance free Linear Guide range offers extended operational uptime
- Range of products designed to operate in extreme temperatures
- Designed to achieve high speeds and positional accuracy

Hydraulic Solenoid Operated Directional Control Valves

- High working pressure
- High flow rates
- Low pressure drop
- With wet type solenoids, these valves ensure low noise and long life

Flat Top Chains

- Engineered specifically for the brewery industry
- Applications with many innovative surface and material options
- Reduces jams and conveying tip ups
- For high speed, high strength applications

Couplings

- Robust
- Reduced maintenance costs and downtime
- Application related design

adding the right ingredients to help make you even more successful

Working with Rubix goes a lot further than simply delivering the right part at the right price at the right time.

We understand the pressures you face in relation to driving down costs while optimising production efficiency. This means that we can:

- Use our sourcing expertise and substantial international buying power to reduce your parts acquisition costs
- Offer you the option of alternative quality branded parts, or suggest alternative products where appropriate
- Introduce production line efficiencies by measuring performance and monitoring their condition
- Train your staff in industrial supplies management and best practice, or even provide you with services within your plant
- Standardise your purchases and rationalise your choice of suppliers; even getting suppliers to hold and manage inventory on your behalf, providing consignment stock where appropriate
- Streamline and consolidate invoicing for more efficient purchasing processes
- Profile stock holding against critical needs to eliminate over or under stocking
- Provide all the invoice and ordering processes online for lower cost process management

And all of this, of course, works like you do, 24/7/365

we've got
brewing
covered

On both national and local levels, Rubix offers a comprehensive range of products and services to support the maintenance, repair and on-going operations of production machinery – keeping industry moving and running at optimum efficiency.

Our customers are buyers, engineers and plant managers who need the right product at the right time, and at the right price. They also want the kind of technical support that only true specialists can provide to make positive impacts on their businesses in terms of production efficiencies and significant cost reductions.

We offer more than 5 million different product lines – 500,000 of which are in stock at any one time, all available 24 hours a day, 365 days a year. Via our centrally-located National Distribution Centre in the Midlands, plus a network of branches across the UK, we'll get it to you on time, every time.

In addition we operate on-site at more than 200 customers' businesses – including full dedicated bespoke branches at over 100 customer Insite™ locations.

Larger customers with multi-site operations throughout the UK are provided with a dedicated Key Account service to add real value to your maintenance operations, to ensure that all aspects of a national agreement are implemented successfully across all sites, and that service level commitments are fully met.

With our specialist expertise, international strength and local presence – combined with our thorough understanding of the brewing industry – we are ready to become your parts and products partner.
