

RUBIX

 part of
your
success

high flying expertise
for the aerospace
industry 

understanding your business

At Rubix we have extensive experience of working with some of the biggest names in aerospace. All across the UK, many businesses in the sector choose us for their industrial supplies and services because of our specific expertise.

Our vast experience means we are able to better understand the unique and special needs that relate to your business.

We understand how important issues like availability, health and safety, energy consumption and cost reduction affect your business. We also understand what impact these issues have on your requirements and how we can apply our expertise in your industry to provide you with the best parts, products and support.

Heavy loads, vibration and extreme temperatures require the application of very high quality parts. Whether you are manufacturing fuel systems, landing gear through to wings, fuselages, flight control

surfaces, nacelles or engines you need optimal energy efficiency and the most efficient products for your process.

We know that there are key issues that can impact the parts you use in your production:

- Availability
- Health & Safety
- Downtime
- Energy conservation

For businesses with a need to keep production lines running 24/7/365, always having the right part at the right time is vital – and we're here to help.

Site safety is paramount – a protected team is a productive team. As part of our services we offer one of the UK's most comprehensive, compliant PPE clothing and equipment ranges to keep everyone working safely.

Plus we also provide a bespoke branded workwear solution for your workforce.

Rubix Cutting & Machining

Nationwide specialist division offering product supply, manufacturing regrind services, product proving and expert technical support.

Our new division integrates Rubix's cutting and machining tools, technical competency centres and expert time-served specialist engineers nationwide.

Our expertise, track record in this sector and respect earned from our customers over the years now combines as one division, making it even easier for you to do your cutting and machining business with us.

For all your cutting and machine product needs:

Expert cutting and machining technical support

A complete range of leading quality cutting tools

On and off site technical support and engineered solutions

Measured cost savings, reducing machining times

parts, products
and services for
the aerospace
industry

right part.
right price.
right service.

Getting the part you need when you need it is critical. We understand how much our customers count on us to deliver, so we're committed to having exactly what you need in stock and immediately available, 24/7/365. Via our centrally-located National Distribution Centre in the Midlands and our network of branches across the UK, we'll get it to you on time and at the right price too.

Leaders in bearings
and mechanical power
transmission solutions

Working with the world's leading manufacturers, we can help you minimise downtime, extend the period between planned maintenance, improve performance all round, and help to reduce your energy consumption.

Mechanical Power
Transmission

- Bearings and Accessories
- Power Transmission
- Gearboxes and Motors
- Linear Motion
- Motion Control

take flight with Invend™ solutions for efficiency and cost savings

Here is just one typical example of how we apply our specialist expertise to help companies in the aerospace sector across the UK every day.

The customer's inventory items were issued from a central store making it difficult to track who was ordering what, why and how frequently. Their replenishment stores' opening times were also limited, leading to stockpiling products around the site.

Rubix introduced Invend™ machines to the shop floor, issuing authorised staff with unique access codes. This gave 24/7 access to over 70% of the most frequently used consumables. The remaining items were held centrally. The customer reported a 45% reduction in spend and improved productivity as walk and wait times were significantly reduced.

First for fluid power

We offer over 1 million individual lines and have the widest available range to ensure continuity of production. Our technical specialists ensure customers receive the right advice, provide on-site support and engineering solutions to improve production efficiency.

Flow Technology

- Seals and Anti-vibration
- Pneumatics
- Hydraulics
- Process Equipment
- Flow Tech Instrumentation
- Filtration

Industrial tools and consumables

Hand tools, machine tools, abrasives, adhesives... we hold over 13,000 tool products in stock from all the major brands. We've got the right tool for every application, with tool storage and all the advice you need too.

Tools and General Maintenance

- Tools and Metrology
- Fasteners and DIN-Parts
- Cutting Tools/Machining
- Welding, Brazing, Soldering
- Chemical Products
- Equipment
- Industrial Consumables

High-level protection without the high cost

There's no compromise on health and safety in the workplace which is why we stock a wide choice of protective clothing, equipment, hygiene products and workplace signage to keep you and your employees comfortable and safe as well as productive.

Health and Safety

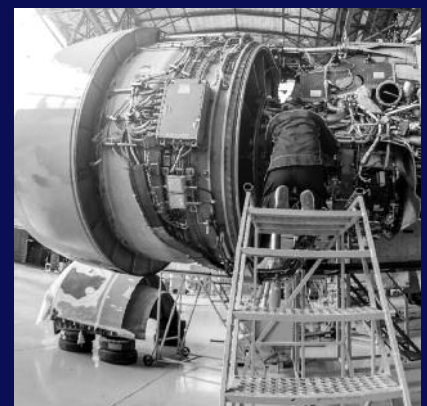

- Head to Toe Protection
- Fall Protection
- Janitorial Supplies
- Hygiene Equipment
- Site Safety

adding the right solutions to help make you even more successful

Working with Rubix goes a lot further than simply delivering the right part at the right price at the right time.

We understand the pressures you face in relation to driving down costs while optimising production efficiency. This means that we can:

- Use our sourcing expertise and substantial international buying power to reduce your acquisition costs through OEM conversion
- Provide you with a dedicated, experienced resource with all the benefits of our huge buying power right where you need it – on your site. Our Insite™ solution supports asset management and follows the regulatory process
- Improve production line efficiencies through innovation, performance measurement and condition monitoring
- Promote best practice in industrial supplies management and even provide you with services within your plant
- Standardise your purchases and rationalise your choice of suppliers with our Vendor Managed Services; even getting suppliers to hold and manage inventory on your behalf, providing consignment stock where appropriate
- Streamline and consolidate invoicing for more efficient purchasing processes
- Profile stock holding against critical needs to eliminate over or under stocking
- Reduce costs in purchasing and invoicing through e-Commerce solutions including an Online Procurement Manager and EDI integration where possible

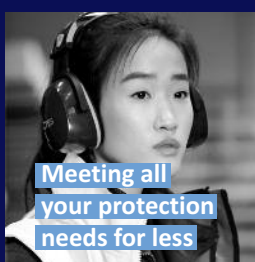

And all of this, of course,
works like you do, 24/7/365

Same quality, performance and reliability as premium brands but at a better price

CUTLINE

we've got aerospace covered

On both national and local levels, Rubix offers a comprehensive range of products and services to support the maintenance, repair and on-going operations of production machinery – keeping industry moving and running at optimum efficiency.

Our customers are buyers, engineers and plant managers who need the right product at the right time, and at the right price. They also want the kind of technical support that only true specialists can provide to make positive impacts on their businesses in terms of production efficiencies and significant cost reductions.

We offer more than 5 million different product lines – 500,000 of which are in stock at any one time, all available 24 hours a day, 365 days a year. Via our centrally-located National Distribution Centre in the Midlands, plus a network of branches across the UK, we'll get it to you on time, every time.

In addition we operate on-site at more than 200 customers' businesses – including full dedicated bespoke branches at over 100 customer Insite™ locations.

Larger customers with multi-site operations throughout the UK are provided with a dedicated Key Account service to add real value to your maintenance operations, to ensure that all aspects of a national agreement are implemented successfully across all sites, and that service level commitments are fully met.

With our specialist expertise, international strength and local presence – combined with our thorough understanding of the aerospace industry – we are ready to become your parts and products partner.
